Re: Tariff Classification Opinion on Disposable Aluminium Foil Containers.

We refer to our earlier tariff classification opinion on the disposable aluminium foil containers.

The disposable aluminium foil containers are of a kind commonly used in the kitchen, principally for the commercial preparation, packing and conveyance of foods. The containers vary in form and size (generally rectangular or round). The articles are frequently used in the baking industry to contain the food during the production and cooking phase. The food is subsequently conveyed and sold in the foil container. Such containers are usually discarded after one use.

The disposable aluminium foil container is most appropriately classified under HS code 76151090.

This ruling supersedes all other tariff opinion given on the subject item and the new ruling will be effective from the date of this letter.

For any further clarification, you may contact the Tariff & Trade Section, Suva.

Yours faithfully,

Mohammed R. Shameem
